1. Inception of the Fund. Class I share inception May 4, 2007.
2. Total net assets of all share classes.
3. Expense ratio data is sourced from the Fund's most recent prospectus.
4. Total annual turnover quoted from the most recent annual report.

*Dan Manion has retired from Sentinel effective April 28, 2017 and no longer manages the Fund.

Morningstar ratings reflect historical risk-adjusted performance and are subject to change every month. Exchange-traded funds (ETFs) and open end mutual funds are considered a single population for comparative purposes. Ratings are based on a risk-adjusted return measure that accounts for variations in monthly performance. Ratings do not take into account the effects of sales charges. Morningstar ratings emphasize downward variations and reward consistent performance. Ten percent of the funds in a category receive five stars, 22.5% four stars, 35% three stars, 22.5% two stars and 10% one star. The Overall Rating reflects a weighted average of a fund's 3-, 5- and 10-year (if applicable) risk-adjusted performance.

Dan Manion has retired from Sentinel effective April 28, 2017 and no longer manages the Fund.

Large company stocks as a group could fall out of favor with the market and underperform investments that focus on small and mid-sized company stocks.

International securities are subject to political influences, currency fluctuations and economic cycles that may be unrelated to those affecting the domestic financial markets and may experience wider price fluctuations than US domestic securities.

Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market. Standard deviation is a statistical measure of the volatility of a fund's or index's returns. Information ratio is a measure of portfolio management's performance against risk and return relative to a benchmark or alternative measure. Sharpe ratio uses standard deviation and excess return to determine reward per unit of risk. Up and Down Capture is a measure of how well a manager was able to replicate or improve on phases of positive benchmark returns, and how badly the manager was affected by phases of negative benchmark returns.

- Performance of the Class A shares prior to June 30, 2012 has not been adjusted to reflect the decrease in the maximum 12b-1 fee from 0.30% to 0.25%. If it had, those returns would be higher.
- Performance of the Class C shares prior to their inception on May 4, 1998 is based on the performance of the Fund's Class A shares, adjusted to reflect that Class C shares do not charge a front-end sales charge but may be subject to a CDSC and for higher ongoing expenses. The "since inception" performance data for Class C shares is calculated from the inception date of the Fund.
- Performance of the Class I shares prior to their inception on May 4, 2007 is based on the performance of the Fund's Class A shares restated to reflect that Class I shares are not subject to a sales charge. The "since inception" performance data for Class I shares is calculated from the inception date of the Fund. Only eligible investors may purchase Class I shares, as described in the prospectus.
- Performance of the Class R6 shares prior to their inception on December 23, 2014 is based on the performance of the Fund's Class A shares, restated to reflect that Class R6 shares are not subject to a sales charge. The "since inception" performance data for Class R6 shares is calculated from the inception date of the Fund. Only eligible investors may purchase Class R6 shares, as described in the prospectus.

Morningstar peer category is an average of funds within the particular category as determined by Morningstar based on investment styles as measured by their underlying portfolio holdings.

The Standard & Poor's 500 Index is an unmanaged index of approximately 500 widely held US equity securities chosen for market size, liquidity, and industry group representation.

An investment cannot be made directly in an index.
