Fund profile

As of 3/31/2017

Challenge: Knowing where to invest in fixed income markets

Opportunity: Invest in a dynamic strategy that takes advantage of opportunities across the fixed income universe

A trusted team

The same team that manages Sentinel's parent company's \$25+ billion general account lends their specialized experience across multiple asset classes to the Sentinel Total Return Bond Fund.

The team is led by head of investments Jason Doiron, FRM, PRM, who has a background in both risk management and derivatives. The team may use derivatives to shed certain risks, but cannot introduce leverage.

Know what you own

While nontraditional bond strategies utilize hedging tools to mitigate interest rate risk, these strategies tend to exhibit higher correlations to equities and the increased potential for significant losses if equity markets decline.

At Sentinel, we believe an allocation to a dynamic fixed income strategy that offers asset allocation flexibility and hedging tools to further smooth a potential ride to higher interest rates will be important to overall investment success in the years to come.

Who this fund is for

- Investors seeking total return through current income and capital appreciation
- Investors looking to diversify away from equity market risk
- Investors seeking opportunities outside of traditional core fixed income portfolios, but with less risk than nontraditional counterparts

Under an agreement signed between Sentinel Asset Management, Inc., the Sentinel Funds' investment adviser ("Sentinel"), and Touchstone Advisors, Inc., Touchstone has agreed to acquire certain assets related to Sentinel's business of providing investment advisory services to the Sentinel Funds. Closing of the transaction is subject to customary closing conditions, including the approval of the shareholders of each applicable series of Sentinel Group Funds, Inc., and is expected to be completed later in 2017. More information can be obtained at sentinelinvestments.com

All data is as of March 31, 2017 unless otherwise noted.

Data shown is historical performance for Class I shares unless noted and reflects reinvested distributions. Investment return and principal value will vary so that you may have a gain or loss when you sell shares. Past performance does not guarantee future results; current performance may be higher or lower than data quoted. For performance current to the most recent month-end, visit www.sentinelinvestments.com.

While the Fund's investments may limit downside risk over time, the Fund may produce more modest gains than riskier stock funds as a trade-off for this potentially lower risk. The Morningstar Peer Group return is an average of funds within the particular category as determined by Morningstar based on investment styles as measured by their underlying portfolio holdings.

Correlation is a statistical measure of how two securities move in relation to each other.

Please see other side for important disclosure.

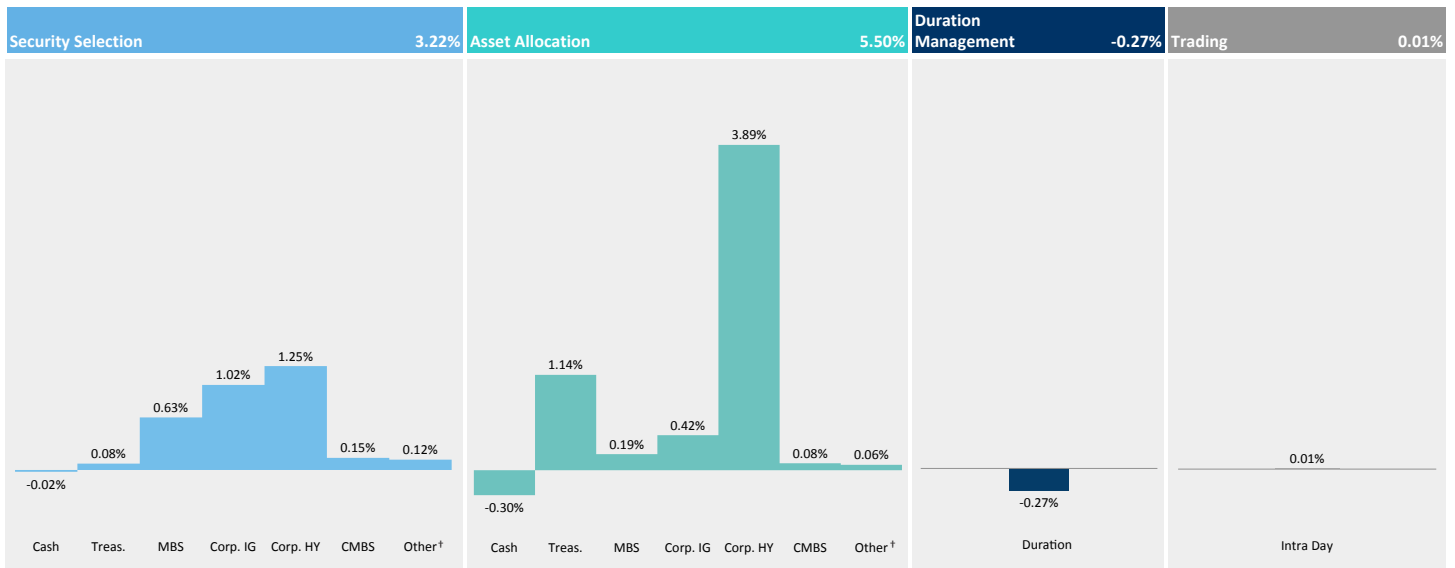

NOT FDIC INSURED • MAY LOSE VALUE • NO BANK GUARANTEE

Before investing, carefully consider a fund's objectives, risks, charges and expenses. Summary and full prospectuses containing this and other information are available from sentinelinvestments.com. Please read them carefully.

Sentinel Investments is the unifying brand name for Sentinel Financial Services Company, Sentinel Asset Management, Inc., and Sentinel Administrative Services, Inc. Sentinel Funds are distributed by Sentinel Financial Services Company, One National Life Drive, Montpelier, VT 05604, 800-282-FUND, www.sentinelinvestments.com.

Performance Attribution (5 Years)

Investment process highlights

Quantitative and Fundamental Analysis

A security-centric approach is used for initial portfolio construction. Sector allocation and security selection rely on a complementary blend of quantitative and fundamental analysis.

Diverse Alpha Generation

Outperformance is pursued through a combination of security selection, asset allocation, duration management and trading.

Risk Aware Focus with Hedging Capabilities

Asset allocation, duration management and trading strategies are utilized as overlays to manage risk and optimally position the Fund in changing market environments. Derivatives are used to manage risk. The Sentinel Total Return Bond Fund is prohibited from using leverage.

Fixed Income securities are subject to credit and interest rate risks. Bond values will generally

decrease when interest rates rise and will generally increase when interest rates fall. Mortgage-backed securities (MBS) are subject to pre-payment risk. These risks may result in greater share price volatility. Bonds with lower credit ratings are more speculative and likely to default than higher-quality bonds and tend to fluctuate more widely in value. International securities are subject to political influences, currency fluctuations and economic cycles that may be unrelated to those affecting the domestic financial markets and may experience wider price fluctuations than US domestic securities. Fund shares are not insured or guaranteed by the US government or its agencies.

The Fund may use derivatives, which are financial contracts whose value depends upon or is derived from the value of an underlying asset, reference rate, or index. The Fund may use derivatives as part of a strategy designed to reduce exposure to certain risks, such as risks associated with changes in interest rates, or currency or credit risk ("hedging"). The use of derivatives may reduce the Fund's return and increase the volatility in movements in the Fund's net asset value. For additional information regarding the use of derivatives, please see the Fund's current prospectus.

† "Other" includes Agency Debentures, ABS and Non-Corporate Credit.

Alpha is the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.

Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates.

The Standard & Poor's 500 Index is an unmanaged index of approximately 500 widely held US equity securities chosen for market size, liquidity, and industry group representation.

The Bloomberg Barclays US Aggregate Bond Index is an unmanaged index of the US investment grade fixed-rate bond market, with components for government and corporate securities, mortgage pass-through securities and asset-backed securities.

An investment cannot be made directly in an index.

1. Class I shares do not impose a sales charge. Only eligible investors may purchase Class I shares, as described in the prospectus.

2. Performance of the Class R3 and Class R6 shares prior to their inception on December 23, 2014 is based on the performance of the Fund's Class A shares, adjusted to reflect that Class R3 and Class R6 shares do not charge a front-end sales charge and, in the case of the Class R3 shares, adjusted for Class R3's estimated higher expenses. The "since inception" performance data for Class R3 and Class R6 shares is calculated from the inception date of the Fund. Only eligible investors may purchase Class R3 and Class R6 shares, as described in the prospectus.

Before investing, carefully consider a fund's objectives, risks, charges and expenses. Summary and full prospectuses containing this and other information are available from sentinelinvestments.com. Please read them carefully.
