Variable annuities are long-term investments designed for retirement purposes. Early withdrawals may be subject to a deferred sales charge and if taken prior to age 59½, a 10% federal tax penalty may apply. Gains distributed from the annuity will be taxed as ordinary income in the year the money is received.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility. Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

<sup>1</sup> Inception date of the underlying fund option

<sup>2</sup> Average annual return since the inception of the underlying fund option

<sup>3</sup> Most recent calendar quarter

<sup>4</sup> Effective June 1, 2015 the T.Rowe Price Health Sciences Portfolio was closed to new investors and therefore not available as an investment option on this product for contract owners who were not already invested in that fund as of the closing date.

Returns are not annualized for periods under one year.

The non-standardized adjusted historic average annual returns before surrender charge are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. Performance does not reflect the deduction of the surrender charge which, if reflected, would reduce the performance figures shown. The maximum surrender charge is 7% of premium payments.

The non-standardized adjusted historic average annual performance before surrender charge assumes that the Sentinel Advantage contract had been available since the inception of the underlying fund options and that the subaccounts were available as options under the contract.

Variable annuities are long-term investments designed for retirement purposes. Early withdrawals may be subject to a deferred sales charge and if taken prior to age 59½, a 10% federal tax penalty may apply. Gains distributed from the annuity will be taxed as ordinary income in the year the money is received.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility. Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

<sup>1</sup> Inception date of the underlying fund option

<sup>2</sup> Average annual return since the inception of the underlying fund option

<sup>3</sup> Most recent calendar quarter

<sup>4</sup> Effective June 1, 2015 the T.Rowe Price Health Sciences Portfolio was closed to new investors and therefore not available as an investment option on this product for contract owners who were not already invested in that fund as of the closing date.

Returns are not annualized for periods under one year.

The non-standardized adjusted historic average annual returns after surrender charge are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. The maximum surrender charge is 7% of premium payments. The surrender charge schedule applies to each premium payment and declines 1% for each completed contract year since payment.

The non-standardized adjusted historic average annual performance after surrender charge assumes that the Sentinel Advantage contract had been available since the inception of the underlying fund options and that the subaccounts were available as options under the contract.

Fund shares are not guaranteed by the U.S. government.**

Variable annuities are long-term investments designed for retirement purposes. Early withdrawals may be subject to a deferred sales charge and if taken prior to age 59½, a 10% federal tax penalty may apply. Gains distributed from the annuity will be taxed as ordinary income in the year the money is received.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility. Investment in global markets may include added risks such as currency fluctuations and other economic and political factors. Returns are not annualized for periods under one year.

<sup>1</sup> Date the portfolio was first included in the subaccount, except where additionally noted below

<sup>2</sup> Average annual return since the inception of the separate account

<sup>3</sup> Most recent calendar quarter

<sup>4</sup> Effective June 1, 2015 the T.Rowe Price Health Sciences Portfolio was closed to new investors and therefore not available as an investment option on this product for contract owners who were not already invested in that fund as of the closing date.

<sup>5</sup> The Wells Fargo Advantage Discovery Fund Subaccount and the Wells Fargo Advantage Opportunity Fund Subaccount invested in the Strong Mid Cap Growth Fund II and the Strong Opportunity Fund II, respectively, for the period from 7/2/1997 through 4/10/2005, when the Strong Mid Cap Growth Fund reorganized into the Wells Fargo Advantage Discovery Fund, and the Strong Opportunity Fund II reorganized into the Wells Fargo Advantage Opportunity Fund. The performance figures for these Subaccounts therefore reflect the investment performance of the Strong Mid Cap Growth Fund II or the Strong Opportunity Fund II through 4/10/2005 and the Wells Fargo Advantage Discovery Fund and the Wells Fargo Advantage Opportunity Fund beginning 4/11/2005.

Contract inception date was 7/1/1997.

The standardized average annual returns are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. Performance reflects the deduction of the surrender charge which reduces the performance compared to performance under the assumption that the contract is not surrendered. The maximum surrender charge is 7% of premium payments. The surrender charge schedule applies to each premium payment and declines 1% for each completed contract year since payment.
